The book is written by two leading experts in the field of green building, John Straube and Paul Kedrosky. Straube is the founder of the California Straw Building Association, and Kedrosky is a solar energy consultant and the author of several books on sustainable building.

The Yin House Handbook is divided into three parts. The first part covers the basics of energy-efficient design, including site selection, passive solar design, and insulation. The second part covers the different components of a green home, such as windows, doors, and roofing. The third part covers the construction process, from foundation to finish.

The Yin House Handbook is a valuable resource for anyone who is interested in building an energy-efficient home. It's packed with practical advice and tips, and it's written in a clear and concise style.

What's Inside the Yin House Handbook?

The Yin House Handbook covers a wide range of topics related to energy-efficient home design and construction. Here are just a few of the things you'll learn:

- How to select a site that is suitable for an energy-efficient home
- The basics of passive solar design
- How to choose the right insulation materials for your home
- The different types of windows and doors available for energy-efficient homes
- How to choose the right roofing materials for your home
- The construction process for an energy-efficient home

Who Should Read the Yin House Handbook?

The Yin House Handbook is a valuable resource for anyone who is interested in building an energy-efficient home. It's packed with practical advice and tips, and it's written in a clear and concise style.

The book is particularly useful for:

- Homeowners who are planning to build or remodel a home

- Builders and architects who are interested in learning more about energy-efficient design
- Students who are studying green building or sustainable architecture

Praise for the Yin House Handbook

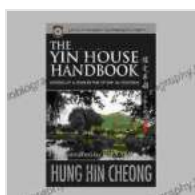

The Yin House Handbook has been praised by experts in the field of green building.

"The Yin House Handbook is a comprehensive and practical guide to designing and building energy-efficient homes. It's a must-read for anyone who is interested in building a green home." - Alex Wilson, Executive Director of the American Solar Energy Society

"The Yin House Handbook is a valuable resource for anyone who is interested in learning more about energy-efficient design. It's packed with practical advice and tips, and it's written in a clear and concise style." - Sarah Susanka, author of The Not So Big House
